Budapest, November 12, 2010

Dear All,

I hereby would like to draw your attention to two excellent programs at **Central European University (CEU), Budapest.**

Our **PhD program in Mathematics and its Applications** was registered in 2004 by the Education Department of the State of New York, USA, so it is recognized throughout the world. The program covers major branches in both mathematics and its applications. It is carried out jointly with the Alfred Renyi Institute of Mathematics of the Hungarian Academy of Sciences. We further have partnership agreements with other prominent institutions from abroad. Outstanding foreign scholars are regularly invited to deliver lectures and teach our students, among whom were Carsten Carstensen (Germany), Constantin Corduneanu (USA), Eduard Feireisl (Czech Republic), Peter D. Lax (USA).

Furthermore, the Department offers a **two-year Master of Science (MS) program in Applied Mathematics**, which is also carried out in cooperation with the Renyi Institute. It was accredited in the US in 2008. This program is focused on modern topics, including analytical, statistical, numerical and computational methods, which are essential in the employment market building strongly on cross-disciplinary practical skills.

The language of instruction at CEU is English.

CEU is also renowned for excellent financial aid plans and outstanding facilities and services for its students, such as excellent libraries, IT facilities, student services, etc. For more details in this respect, please visit our webpage **<http://web.ceu.hu/math>**

Should you have questions please contact us at **mathematics@ceu.hu**

Sincerely yours,

Gheorghe Morosanu
